

EGERTON UNIVERSITY INTERNATIONAL CONFERENCE

Egerton University 14th Biennial International Conference Overview

PREAMBLE

Egerton University announces its Biennial International Conference to be held on the 23rd, 24th and 25th March, 2022. This will be the 14th edition of the International Conference organised by the University and brings together people from academia, research institutions and other industry experts in various fields to a common forum. The Conference is organized and hosted by the Division of Research and Extension and has attracted up to 700 participants per edition in the past.

The aim of the conference is to provide a platform for participants to share their experiences and research results, deliberate and exchange innovative cutting-edge development ideas, concepts and actions. This will include keynote speakers, paper presentations, interactive panel discussions, question and answer sessions and exhibitions.

This will be a blended (virtual and face to face sessions) conference due to the Covid 19 pandemic. The theme of the conference will be ***Research and Innovations for Resilience in a Changing Environment***. In highly volatile and uncertain times, organizations need to be resilient to cope effectively with unexpected events, recover from crises and even foster future success. Underlying this theme is the acknowledgment that Science, Technology and Innovation are major drivers and enablers of social and economic transformation. The application of knowledge and innovation is necessary to attain sustainable economic growth and competitiveness.

Authors have opportunities to address this broad theme under seven sub themes:

1: Transformative Agri-food Systems

management and preparedness, modern and advanced laboratory and diagnostic techniques, chronic disease management, drug and vaccine development, one health, zoonoses, sanitation, health policy issues, science (molecular biology and biochemistry, biosciences, chemistry, physics, botany, microbiology, zoology and mathematics), engineering, computing and information technology.

3: Innovations in Climate Change and Natural Resource Management

Papers preferred under this sub theme would be those discussing innovations in climate change management, ecosystem restoration, smart and green development, sustainable resource use, disaster risk reduction, resource use conflict management.

4: Transformative Education for Social-Economic Adaptability

The papers under this sub theme should include education and 21st century skills, education and global citizenship, Covid19 and education, education and vaccine nationalism, competency-based education as a curriculum innovation, teacher quality and students' achievement, application of ICT in education, Goals, Policy, funding and quality of education.

5: Resilience and Ruptures in Governance and Geopolitics in Africa

The papers under this sub theme would be on COVID19 and other factors and their impact on governance, service delivery, policing, national security, electoral politics, countering violent extremism, radicalization and terrorism, geopolitics, regional conflicts such as maritime dispute and researchers working on social issues. Resilience of civil society organizations and community structures in the face of pandemics and disasters, dwindling support of development partners, and restrictions on social interactions and delivery of vital interventions to communities, Globalization Impacts, Social networking, e-government.

6: Literature, History and Culture.

The papers preferred under this sub theme would be those discussing research outputs innovations in the following broad areas: Language and Literature, Language and Communication, Language, Identity and Culture, Literature and Gender, Nature of Historv. African Historv. Economic Historv. Gender and life course.

Ethics and Finance.
